

# How to make a drum...

Creating a drum is a great way to design your own percussion instrument and make your own music.

Find an empty plastic or cardboard container with a lid.

Design and decorate your drum. You might want to use tissue paper, paint, stickers or feathers. You also might want to add some colourful material under the lid. You can be as creative as you like!

Use your hands or blunt wooden sticks such as pencils, paint brushes or a wooden spoon to play your drum.
