

How to make a rainbow shaker...

Creating a rainbow shaker is a great way to design your own percussion instrument and make your own music.

Find an empty container that has a lid. Each type of container will make a different sound.

Fill with rice, beans, lentils, beads or pasta. You might notice that the amount you use will change the sound of your rainbow shaker.

Decorate with rainbow colours and shake!

You might want to use paint, beads, paper, stickers, glitter, feathers or felt. You can be as creative as you like!
