

How to make Roundabout Slime

Ingredients for slime

1. Half a cup of clear PVA glue
2. Acrylic paint
3. A $\frac{1}{4}$ teaspoon of Baking Powder
4. 1 teaspoon of Contact Lens Solution – it has to contain Boric Acid or Sodium Borate
5. To make your slime sparkle you can add also glitter

Slime is fun and very easy to make

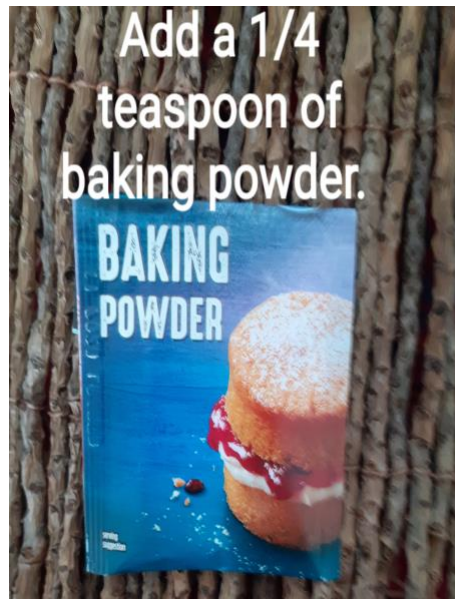

Add half a cup of clear washable PVA glue.

Choose your favourite colour of acrylic paint and start with a few drops. You can always add more later to make it darker.

Add a tiny bit (a few drops) of acrylic paint.

Add a 1/4 teaspoon of baking powder.

Add 1 teaspoon of contact lens solution.

You will need to stir, stir and stir until your slime thickens and it will form into a slime ball. Once it has thicker you can then add your glitter if you wish.
